1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 7, line 1, changed "5" to -1—

Claim 8, line 1, changed "5" to -1—

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose the claimed relationship between the length of the main body and the opening between the main body locking portion and both the second slide end and the first main body end. That relationship, wherein the opening length is more than 60% of the main body length is critical to the invention. The specification, on page 10, states

"the main body 56 has a longitudinal main body length and the insertion opening having a longitudinal insertion opening length that is more than 60% of the main body length. A relatively large insertion opening is suitable for allowing a gear and/or base unit attachment mechanism to be positioned within and removed from the sliding reusable connector 50 without significant manipulation. This is a significant advantage over traditional Alice clips which have a relatively small

opening that often requires that the gear and/or base unit attachment mechanism be scrunched, pinched, or folded for insertion. It should be noted, however, that because traditional Alice clips do not have a true locking structure (in that they can easily open), the opening must be small so that gear 52 will not fall off easily when the Alice clip springs open.”

Therefore, the criticality of the larger opening is tied to the positive locking function of the slide locking structure to enable easier placement of the attachment mechanism within the connector without the unwanted disconnection, during use, between the slide and the main body. None of the prior art references disclose the claimed relationship between the length of the opening and the length of the main body.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack W. Lavinder whose telephone number is 571-272-7119. The examiner can normally be reached on Mon-Friday, 9-4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner’s supervisor, Judy Swann can be reached on 571-272-7075. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
